

CardioCare — Heart Risk Report

Generated on 08-06-2026 00:00

■ High Risk — Score: 100.0 / 100

Your indicators suggest a high risk of heart disease. Please seek immediate medical consultation.

Observed / Possible Symptoms

- Chest pain, pressure, or squeezing sensation
- Severe shortness of breath
- Pain radiating to arm, neck, or jaw
- Dizziness or sudden cold sweats
- Irregular heartbeat (palpitations)
- Swelling in legs or ankles

Recommended Care & Actions

- Consult a cardiologist IMMEDIATELY
- Do not ignore chest pain — go to emergency if needed
- Take prescribed medications without skipping
- Follow a strict heart-healthy diet (DASH diet)
- Complete bed rest and avoid strenuous activity
- Daily monitoring of blood pressure and pulse
- Stop smoking completely

Patient Input Parameters

Parameter	Value
Age	65.0
Sex (1=M/0=F)	1.0
Chest Pain Type	3.0
Resting BP (mmHg)	160.0
Cholesterol (mg/dl)	340.0
Fasting BS > 120	1.0
Resting ECG	1.0
Max Heart Rate	87.0
Exercise Angina	1.0
ST Depression	3.5
Slope of ST	2.0

Major Vessels (0-3)	3.0
Thalassemia	2.0
